

ØRESUND FOOD - NEWSLETTER, MAY 2010

Fremtidens Fødevarer

– for velfærd, sundhed og miljø

What will the future bring?

The conscious consumer wants healthy, safe and tasty food. Food is a very important part of every individual's life, and a well-functioning food sector is of great importance to all of us. But what are the industry's and government's visions and ambitions for the food sector, and which kinds of food can the consumer expect in the future?

"Fremtidens Fødevarer" will be published as a theme newspaper within the ordinary daily press. It can be spotted in this month's (May) "Berlingske Tidende".

Øresund Food members have a chance to be represented either by ads or business presentations in "Fremtidens Fødevarer".

Last call for members is Wednesday the 19th of May.

Networking is about "what can I offer you"!

This was one of the conclusions during a knowledge and experience sharing day for cluster-facilitators, in which Øresund Food participated.

Food-KIC in Europe

Food KIC secretariat visits the Netherlands and KTH in Stockholm

An important part of the work of the Food-KIC secretariat is to reach out in Europe for partnership and international relations.

Recently Øresund Food's Maria Olofsdotter, Niels Gerner and Håkan Hansson together with Peter Olesen, member of the KIC secretariat's Senior Panel, visited the Netherlands. The aim of the trip was to secure continuing Dutch support, awareness and involvement. Representatives from Food Valley, Wageningen University and TOP Institute (Food & Health) met with the Øresund Food-KIC representatives and displayed great interest in the project and the continued cooperation.

Moreover, the Food-KIC secretariat has also visited the KTH Royal Institute of Technology in Stockholm to exchange knowledge and benefit from their experiences with 2 approved KICs and plans to attend a KIC launch conference in Barcelona on the 2nd-3rd of June 2010.
